- SQL / Mongo DB /Firebase

EXPERTISE

- Web Development
- React
- FLutter

EXPERIENCE

Spotify Clone

I have replicated user interface and key features of spotify website using HTML, CSS, and JavaScript. This project enhanced my proficiency in frontend development, particularly in creating responsive designs. This project showcases my ability to translate complex design requirements into a functional and visually appealing web application.

Simon Says Game

I designed and developed Simon Says game web application using HTML, CSS, and JavaScript. The project involved creating a responsive user interface that mimicked the classic Simon game, integrating features such as game logic, user input handling, and dynamic feedback. Through this project, I strengthened my skills in frontend development, including DOM manipulation, event handling, and CSS styling for interactive elements.

On-Roab Vehicle Breakdown Assistance App (FYP)

I developed a mobile application using Flutter that enables users to easily search for nearby assistance incase of mechanical issues related to their vehicles. The app integrates location-based services to identify service providers, offering a user-friendly interface for searching and contacting assistance providers directly. This project enhanced my proficiency in mobile app development with Flutter, Firebase integration for real-time data updates.

Personal Portfolio Site

I have created my personal portfolio site using HTML/CSS and JavaScript. Below is the link to access it.
